EXPERIENCE

API Engineer & Consultant

06/2021 – Present

Capco

Maitland, FL

- Designed a software architecture model for an API integration supporting a major finance client
- Delivered a technical demo of OneTrust that secured a \$525k data privacy project
- Configured and maintained multiple OneTrust environments, proactively resolving issues as they arose
- Advised client development teams on OneTrust API usage and secure authentication via OAuth 2.0
- Conducted trainings and authored documentation on the OneTrust platform for client teams
- Provided guidance on API integration performance, best practices, and issue resolution

QA Lead and Associate

06/2021–12/2024

Capco

Maitland, FL

- Led and coordinated a QA team to perform manual testing and develop test automation
- Trained client teams on the test automation framework using Ruby and Cucumber
- Built a regression test case suite that runs automatically prior to go-lives, significantly improving accuracy and pass rates

Lead Developer 02/2017 – 05/2021 eMerge Technologies Orlando, FL

- Applied advanced JavaScript skills and integrated various APIs to deliver solutions across multiple client projects
- Built and rigorously tested scripts to streamline user workflows for clients operating on outdated or complex systems
- Engaged directly with clients to assess issues and develop custom scripting solutions
